Exam Number/Code:700-303

Exam Name: Advanced Borderless Network Architecture Systems Engineer test

Version: Demo

QUESTION NO: 1
Which two statements are correct about Cisco Validated Design or CVD? (Choose two)

A. CVD consists of systems and solutions that are designed tested and documented to facilitate and improve customer deployments
B. CVD is a prescriptive, scalable, flexible design to quickly deploy a full-service network.
C. CVD gets the design working the first time by using validated configurations and topologies.
D. CVD implementations are mainly partner-led
E. CVD consists of three primary modular yet interdependent components

Answer: A,B

QUESTION NO: 2
Which is a software feature available in Cisco IOS Software recommended to be positioned at the network access layer?

A. Flow Metadata
B. Media Services Proxy
C. NBAR2
D. Mediatrace

Answer: C

QUESTION NO: 3
In which wireless deployment mode is no wireless controller used?

A. Autonomous
B. FlexConnect
C. Centralized
D. Converged Access

Answer: A

QUESTION NO: 4
Which feature of a Cisco Cloud Intelligent Network provides a consistent experience across physical and virtual infrastructure, across branch. DC/HG. and cloud?

A. Optimal experience
B. Pervasive security
C. Simplified operations

D. Lower total cost of ownership

Answer: B

QUESTION NO: 5
Which high availability design consideration produces savings by reducing the number of power supplies required per switch and the number of outlets required in the wiring close?

A. StackPower
B. Spanning VLANs
C. QoS
D. Gateway redundancy

Answer: A

QUESTION NO: 6
Which cloud connectors provide additional reliability through redundant, localized call processing at the customer site during network outages'?

A. Cisco Cloud Storage Connector
B. WebEx Cloud Connected Audio
C. Cisco Unified Border Element (Cisco UBE)
D. Cisco Unified SRST

Answer: B

QUESTION NO: 7
Which option touches on the data flows involved with management applications of the Cisco EnergyWise architecture?

A. Protocol Operation
B. Monitoring Power
C. Controlling Power
D. Cisco Prime LMS

Answer: B

QUESTION NO: 8
The concern of one of your customers is, "How do I quickly isolate and resolve application

performance problems with the Cisco ISR-AX solution?" Which feature of the Cisco solution is a response to this query?

A. With the Cisco solution, you can reduce Application Latency by accelerating applications with full optimization across the WAN
B. With the Cisco solution, you can gain Visibility into encrypted wireless traffic
C. With the Cisco solution, you can provide application visibilityto 1000+ applications with metrics such as Application Response Time, Jitter and bandwidth
D. The Cisco solution provides WAN optimization for every size site

Answer: C

QUESTION NO: 9
One of the benefits of Cisco ISR-AX is that mission-critical applications get pnonty and the optimal path can be selected based on the application type Which capability offers this benefit?

A. Acceleration and optimization
B. Application-level optimization
C. Application-level visibility
D. Application-level control

Answer: C

QUESTION NO: 10
Which two features are appropriate in describing a Cloud Intelligent Network? (Choose two)

A. Provides solely private cloud solutions to customers
B. Integrates the network with the Unified Data Center
C. Provides single-tiered service level agreements
D. Connects data centers to better share and balance resources
E. Is not an effective solution to cater to the growing demands of the movement to cloudbasedservices

Answer: B,D
