`WcmVersioning=true`
- D. Marcel must enter this URL in a browser:
`http://[HOST]:[PORT]/wps/wcm/connect/?MOD=AJPEResourceChecker&fix=true`

Answer: A

QUESTION NO: 4

Eve is the Public Relations Manager for AT Corporation. She needs to post a new Event content object to their website. At some point in the future, the Event must be removed from the live website, however it should not be deleted from the repository. Who can accomplish this task, and how can the task be accomplished?

- A. An editor can click the Restart Workflow button.
- B. An approver can click the Restart Workflow button.
- C. An editor can click the Next Stage button to move the document to the next stage in the Workflow. The next stage would need to have an Expire action.
- D. An approver can click the Next Stage button to move the document to the next stage in the Workflow. The next stage would need to have an Expire action.

Answer: D

QUESTION NO: 5

Kellan is a content creator. He is creating Job Posting content items. The content items should only be published on the live website until the end of the current month. Kellan specifies an expiry date on the content items for the end of the current month. What also must be done to ensure that the content is removed from the live website on that date?

- A. An administrator must delete the content item from the library on that date.
- B. The expiry date must be set in a Date Component that should be added to the content item.
- C. The content item's selected workflow must include an expire action.
- D. Specify the expiry date in the icm.properties file.

Answer: C

QUESTION NO: 6

Christine is a content creator. She has created a content item that has had many modifications made to it after it was published. She would like to view the modifications that she made to the content item last month. How can she accomplish this task?

- A. Restore the content library to a previous version.
- B. Open the content item in Edit mode. Click the Version button, select the version, and click the Preview button.
- C. Create a draft of the content item and select which version to publish. Then, click the Preview button to view the content's details.
- D. Open the content item in Read mode. Click the Version button, select the version, and click the Preview button.

Answer: D

QUESTION NO: 7

Dan is a content creator responsible for adding press release content to his company's website. All his content goes through the PR Workflow. Today he is creating a special press release that needs to be seen by several groups that are not normally given access using the PR Workflow.

How can Dan resolve this problem without contacting a developer?

- A. Dan cannot resolve this on his own. Dan needs to contact the developer and have him modify the PR Workflow.
- B. From any content view, click More Actions / Update Readers. Dan then adds the appropriate groups to the content from the Update Readers page.
- C. When creating the content, Dan should click the Read button in the System Defined area of the Access section. Dan then adds the appropriate groups to this section.
- D. When creating the content, Dan should click the Select Additional Viewers button and add the appropriate groups. The group is able to read the content item after it is published.

Answer: D

QUESTION NO: 8

John is an author creating content for the ABC Corporation. After creating the content, he is trying to preview and verify how the content shows in the website rendered from the same server. But when previewed, the content is rendered in a new web page without the portal themes and skins.

What must he do to preview in a portal page?

- A. To allow users to preview content in portal pages, John must select specific portal pages from the list located under Allow authors to preview content in the local portal pages selected in Previewing Options for Authoring portlet. He must also enter the URL to the page in the local portal server in the Allow authors to preview content using the following URLs section.
- B. To allow users to preview content in portal pages, John must select specific portal pages from the list located under Allow authors to preview content in the local portal pages selected in Previewing Options for Authoring portlet. The selected pages must contain a web content viewer to display the content.
- C. You cannot preview the content as a portal page when authoring content. You must add the content to the actual page with web content viewer and then directly access the page as a regular user and then verify the display.
- D. John must be a Administrator to preview the content in a portal page.

Answer: B

QUESTION NO: 9

Ted has created an HTML component that references an Image component. He wants to change the image but needs to check that the image is not being used anywhere else. What is the best way for him to achieve this outcome?

- A. Use the Advanced Search capability in Lotus Web Content Management to look for the component name in any other components.
- B. Change the image and check the site to see if any other pages have been affected.
- C. Open the Image component and then use the View References -> Show references from item.
This action shows where the image is being used
- D. Open the Image component and then use the View References -> Show references to item.
This action shows where the image is being used.

Answer: D

QUESTION NO: 10
