Exam Number/Code:C2040-985

Exam Name:Developing IBM Lotus
Notes and Domino 8.5 Applications

Version: Demo

QUESTION NO: 1
Daniel is designing a Suggestions application and wants to minimize replication conflicts. Which one of the following will accomplish this?

A. Assign users Editor access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Comment and name the form "Comments". Use Authors fields on both forms.
B. Assign users Author access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Comment and name the form "Comments". Use Readers fields on both forms.
C. Assign users Author access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Response and name the form "Comments". Use Authors fields on both forms.
D. Assign users Editor access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Response and name the form "Comments". Use Readers fields on both forms.

Answer: C

QUESTION NO: 2
Mac is planning a Change Control application that will be used by thousands of staff located in 10 different countries. What is one thing Mac can do to help optimize the performance of the application for his users?

A. On the Advanced tab of Database properties, enable "Support specialized response hierarchy" and enable "Allow simple search"
B. On the Advanced tab of Database properties, enable "Don't support specialized response hierarchy" and disable "Allow simple search"
C. Use File > Application > New Copy to create a copy of the application on a server in each country, and have users access the application from a local server.
D. Use File > Replication > New Replica to create a replica of the application on a server in each country, and have users access the application from a local server.

Answer: D

QUESTION NO: 3
Joe wants to display a company logo in the background of a view in his sales application. How can he do this?

A. Use an Image Resource as the background graphic for the view
B. Use a URL as the background graphic for the view, where the URL points to the logo
C. Display the view in a frameset, and set the background of the view's frame to an Image

Resource or URL depicting the logo
D. He can't do this. Views cannot have background graphics.

Answer: A

QUESTION NO: 4
Kelly supports the Inventory application. This application is accessed by staff in India, the UK, Brazil, and the USA. For reasons of performance and contingency planning, the office in each country has its own server. Kelly needs the Inventory application to reside on each of these servers, and she needs to ensure that the application data and design is kept in sync among all of these locations. How can Kelly meet this requirement?

A. Select the Inventory application. For each server, create a synchronized copy of the application by selecting File > Synchronization > New Copy.
B. Select the Inventory application. For each server, create a mirror of the application by selecting File > Application > New Mirror, and specify the target Server.
C. Select the Inventory application. For each server, create a replica of the application by selecting File > Replication > New Replica, and specify the target Server.
D. Select the Inventory application. For each server, create a copy of the application by selecting File > Application > New Copy. Specify the target Server, and select the Synchronize option.

Answer: C

QUESTION NO: 5
Hassan has been emailed a spreadsheet with information about new training opportunities at his company. He has been asked to update the company's Announcements application with a link that, when clicked, will open the spreadsheet. How can Hassan accomplish this?

A. Import the presentation as a new File Resource, assigning an alias of "New Training". Add a new entry to the application outline, selecting Action as the Content Type, and setting the Content Value to @Command([OpenResource]; "New Training").
B. Embed the presentation on a new page, setting the page Auto Launch property to First OLE Object. Add a new entry to the application outline, selecting Named Element as the Content Type and selecting the new page as the Content Value.
C. Attach the presentation on the About application document. Set the database launch property to launch the first attachment in the About database. Add a new entry to the application outline, selecting Action as the Content Type and setting the Content Value to @Command([HelpAboutDatabase]).

D. Import the presentation as a new Image Resource, retaining the filename extension as part of the resource name. Add a new entry to the application outline, selecting Named Element as the Content Type and selecting the new image resource as the Content Value.

Answer: B

QUESTION NO: 6
Richard's form includes a field that causes a document to be mailed when the document is saved.
Which of the following is the reserved field name that Richard assigned to the field?

A. MailSend
B. ForceMail
C. SaveOptions
D. MailOptions

Answer: D

QUESTION NO: 7
Donna created a full-text index for the PerformanceReview database, and she was careful to select the "Index encrypted fields" option. But the HR managers, who all have the secret key that they use to encrypt the data, have reported that their search results are not yielding the expected results. What is one possible reason for this?

A. The full-text index was created with an id that did not include an encryption key capable of decrypting fields before indexing.
B. The "Index encrypted fields" setting applies only to documents added after the full-text index is created or to documents edited and saved after the index is created.
C. The "Index encrypted fields" setting enables the indexing. The next step before creating the index is to designate the specific encrypted fields that are to be indexed.
D. Encrypted fields can be indexed only from a database replica residing on the administration server as specified on the Advanced tab of the database ACL. Donna had indexed the database on the application server.

Answer: A

QUESTION NO: 8
Marcello wants to create a custom startup page for his customer database, using different buttons and values from profile and normal documents. How can he achieve this?

A. Create an outline with calculated entries, and display this directly through a frameset.

B. Create a view with custom actions that calculate what actions the user might want to take.

C. Create a page with calculated text and actions, and display this using a frameset. Create a frameset, and display that page with dynamic text.

D. Create a form and use action buttons, only calculated for display fields and computed text to display all available options to this specific user. Set the database properties to start with a doclink in the about database document to any document created with this form.

Answer: D

QUESTION NO: 9

In the past, Lloyd has copied an existing application if he needed to create a new application. This time, however, Lloyd wants to create a new application on his own hard drive, and he does not want the application to include any design elements from existing applications. How can he do this?

A. From the menu bar, select File > Application > New. Specify "_blank.nsf" for the new application's filename.

B. From the menu bar, select File > Application > New. Leave the Server option set to "Local", and ensure that the Template option is set to "-Blank-".

C. From the menu bar, select File > Application > New. Leave the Server option set to "Local", and specify "_blank.nsf" for the new application's filename.

D. From the menu bar, Select File > Application > New. Set the Server option to "Local", and specify "_blank.nsf" for the new application's filename. Ensure that the Template option is set to "- Default-".

Answer: B

QUESTION NO: 10
