Exam Number/Code:M2150-709

Exam Name:IBM Security Systems
Sales Mastery Test v3

Version: Demo

QUESTION NO: 1
The IBM Endpoint Manager solution consists of a centrally deployed server and agents deployed on the customer endpoints. Which of the following best describes the agent platform support?

A. Single platform support
B. Multi-platform support
C. Windows only
D. MAC only

Answer: B

QUESTION NO: 2
IBM introduced the Access Manager for Mobile appliance in October 2013. Which of the following is not provided by Access Manager for Mobile?

A. Mobile access management.
B. Federated SSO for software as a service (SaaS) targets such as SalesForce.
C. Mobile identity assurance.
D. Help in securing mobile application deployment.

Answer: D

QUESTION NO: 5
In a potential Access Manager for Web sale, the client is a large customer and has large numbers of applications and servers involved in their SSO/Web authorization plans. Oracle Access Manager (OAM) is the main competitor. What might you emphasize as you try to move the customer in your direction?

A. Access Manager for Web scales well, and is much easier to manage, given a relatively small number of Access Manager for Web servers involved, versus many OAM plug-ins to manage And the appliance version of Access Manager for Web provides faster time to value (TTV).
B. Access Manager scales well and can do software distribution to any and all clients involved in the scope of the SSO engagement.
C. Access Manager both scales well and performs well.
D. Access Manager is on a par with OAM from a scalability point of view, but it has a wider number of applications that it supports out of the box.

Answer: A

QUESTION NO: 6
Which of the following is NOT one of the "4 Principles" of a successful Fraud Prevention Architecture?

A. Fast Time to Value
B. Call Center
C. Adaptive Controls
D. Seamless Experience
E. Effective and Accurate

Answer: B

QUESTION NO: 7
IBM Endpoint Manager is an agent-based solution. Which of the following
characteristics/features
are provided by the agent?

A. Self-removal after 24 hours
B. Continuous policy enforcement
C. Application Scanning capabilities
D. File Integrity Monitoring

Answer: B

QUESTION NO: 8
You are in a competitive user management/identity management/user provisioning sale,
and the decision seems to hinge on who has the superior role management capabilities.
You handle this by:

A. Expanding the discussion to include access management and pulling Access Manager
into the sale.
B. Expanding the discussion to include enterprise audit management and compliance and
pulling QRadar into the sale.
C. Bringing Tivoli Provisioning Role Manager into the picture.
D. Touting Identity Manager's significant role management capabilities and emphasizing
the fact that IBM SIM comes with Role and Policy Modeling in the package, whereas
competitors charge extra for it.

Answer: A

QUESTION NO: 9
There are several key integrations of AppScan and other IBM Security solutions. Choose
the answer that names two of those integrations and their value.

A. Integration with Guardium to identify application vulnerabilities of high value databases;
Integration with Access Manager to protect applications from unauthorized access
B. Integration with IPS to remediate identified vulnerabilities and identify virtual patches;
Integration with Trusteer to identify applications that allow fraud

C. Integration with IPS to remediate identified vulnerabilities and identify virtual patches; Integration with QRadarto identify application vulnerabilities that contribute to enterprise exposures

D. Integration with QRadar to identify application vulnerabilities that contribute to enterprise exposures; Integration with Key Lifecycle Manager to provide application encryption key management

Answer: C
